

State of Jobs Report

Mapping **Human Potential** in the AI Era — with a focus on Latin America & the Caribbean.

The State of Jobs Report is a **practical playbook** for turning human potential into measurable, investable outcomes — especially in the Global South.

It moves beyond theory to help multilateral banks, governments, and development partners answer the most urgent question of our time:

“How do we **create sustainable jobs** at scale in an **AI-driven economy**?”

CONTENTS

Who is it for?

For Policymakers:

Integrates job creation into national planning, AI policy, and fiscal infrastructure

For Multilateral Banks:

Offers impact-linked models for funding talent, not just projects

For Employers:

Benchmarks job functions by AI risk and opportunity

1

Executive Summary — Why & What we must do.
